

TECH SPECS : Animations

1. What's in the final package

The animations are stored as Animated GIF images in the following master formats:

- 400x400 pixel Aspect Ratio 1:1
- 400x300 pixel Aspect Ratio 4:3
- 300x400 pixel Aspect Ratio 3:4
- 1000x1000 pixel HIRES Master Only HIRES Images!

Newer images are produced from a 1000x1000 pixel master, the animations are designed so they can be cropped and resized to fit!

Handset formats (optional):

In addition there are over 50 rendered resolutions for almost all of the current handsets on the market, this list grows continuously. All of those resolutions are produced from the master files, so you can also do this by yourself. Currently (April 2011) available:

128x160	162x216	240x320	208x320	174x132	174x143
208x144	128x127	174x136	96x65	176x208	130x128
176x182	208x208	176x153	96x64	176x178	352x416
101x80	128x143	176x176	176x205	352x288	320x240
320x320	240x400	240x260	220x176	220x220	128x128
240x240	130x130	160x128	160x160	240x160	240x440
240x480	320x200	128x220	360x480	176x144	160x120
480x640	480x360	360x640	320x480	480x320	480x800
480x854	600x1024	120x160	128x96	132x176	176x220

Also there are two animated preview files per animation (100x75 pixel, 100x100 pixel), both with the word "preview" rendered over the actual image file.

2. Handset Compatibility

Animations are compatible with practically any handset on the market not older than five years '(or especially constructed to be NOT rich media enabled).
