Title: **Pictrix!**

Brief Desc.: Place falling tiles, complete lines – and reveal an image as reward! This is an improved clone of one of the most famous games ever!

Full Desc.: Remember Tetris? Of course you do! As in the original game it's your task to place tiles strategically, so that complete lines vanish from the display, making place for new tiles. In Pictrix you have to complete an increasing amount of lines in every level, every completed line reveals a little more of an image as reward!
