

## TECH SPECS : Poly / Mono Ringtones

### 1. What's in the final package

Files are named with 5 digit numbers, corresponding to our internal content ID. In addition you will get Excel sheets which are assigning names & categories to each item.

Items are available in 2 levels of polyphony and as 1 channel monophonic tune.

Every content item is available in the following formats:

Folder Name	Format
midi_1channel	Monophonic MIDI
midi_4channel	Polyphonic MIDI , 4 channels
midi_16channel	Polyphonic MIDI , 16 channels
mmf_16channel	SMAF , 16 channels
prehear_mono	MP3 prehear of the monophonic file
prehear_poly	MP3 prehear of the polyphonic file
rtttl_1channel	RTTTL text version of the monophonic tune

### 2. Handset Compatibility

A sheet with our current handset database will be in the final package, this sheet shows which handset uses which content format (and therefore which handset is capable of using this kind of content in the first place...)
